# ROVOTIC INTRODUCTION

ROVOTIC is a dedicated software company committed to fostering growth within our community. We specialize in supporting established businesses and transforming our clients' visions into reality. Our IT teams consist of diverse experts, each specializing in various fields, including software and hardware engineering, ICT Technology. We are dedicated to delivering high-quality IT services that meet the highest industry standards.

We strongly believe that any companies should invest wisely in technology and, as a rule, increase their operational maturity much faster than their competitors. With a stable ICT platform, Companies can innovate and develop unique and efficient business processes. The outcome is an organization with a powerful brand, inspiring culture, and increased revenue performance.

# ABOUT US

We are proud to say that ROVOTIC is a 100% European company founded in 2020 by two young men and now we employ over 30 skilled Worldwide, today is one of the most successful companies in UK, having a solid base of highly Skill engineers with valuable knowledge in dealing with locally and international.

## Our mission

To provide seamlessly integrate proven and reliable software and technology into every aspect of our clients' processes.

We prioritize understanding and addressing customer needs, recognizing that our success is intrinsically linked to our clients' success.

We provide comprehensive support throughout the entire software solution lifecycle, from pre-development to post-warranty, ensuring our clients effectively achieve their goals.

# OUR SERVICES

Our high-availability data links via satellite form the centerpiece of our services and offer companies a reliable, efficient and fail-safe communication solution. State-of-the-art technology guarantees a robust infrastructure that complies with the highest security standards.

Our focus is to provide companies in various industries with secure and uninterrupted access to the Internet, corporate networks and cloud-based services.

- **Audio Visual Solutions CCTV, Alarm System**
- **Business Application & App Development**
- **Business Solutions**
- **ICT Network Infrastructure**
- **Mobile Communication**
- **VSAT Communication Services**

## Audio Visual Solutions, CCTV, Alarm Systems

Our high-availability data links via satellite form the centerpiece of our Video Conference Solutions with RF-ROVOTICs. We provide the latest integrated conferencing technology for voice, video, and web that efficiently responds to the needs of today's corporate standards and allows companies to adapt and grow as their business evolves. We offer solutions tailored to the specific requirements of each customer, from traditional audio conferences to tele-presence conferences. Share applications, presentations, and documents. Smart attendance System sending notification to mobile phone and system.

Interact with anyone, anywhere, at any time. Work with teams from around the world, simply using an internet connection. Maximize resources by bringing people together and saving time and money.

## Closed-Circuit Television system

Our closed-circuit television (CCTV) systems serve crucial roles in surveillance and security. This includes the installation of cameras, configuration of monitoring systems, and ensuring optimal operational functionality for crime prevention and safety.

## Installation and Maintenance Responsibilities:

- Install firefighting systems, alarm systems, and CCTV systems in compliance with safety regulations and company standards.
- Configure control systems for seamless integration with fire and alarm systems.
- Conduct regular inspections and preventive maintenance on all installed systems.
- Troubleshoot and repair any malfunctioning systems to minimize downtime.

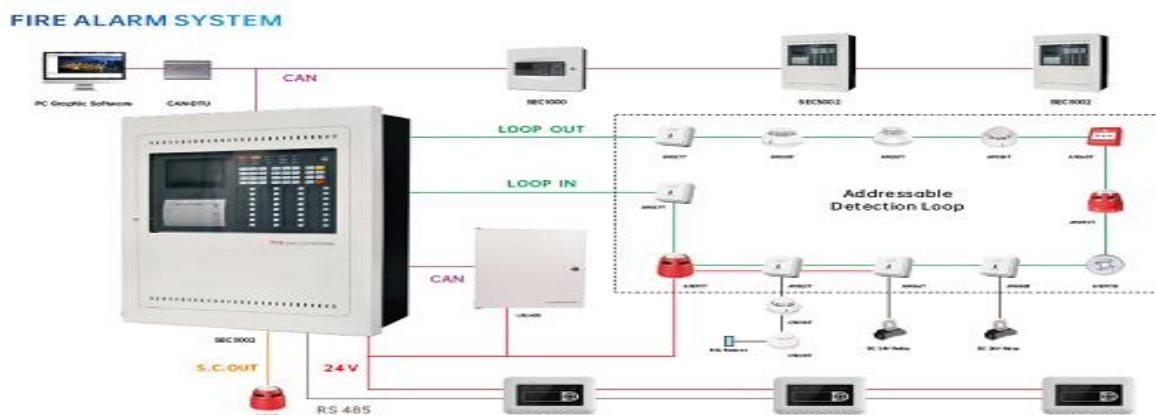

# FIRE Alarm Safety System

We specialize in the installation and maintenance of firefighting and alarm systems, CCTV, and control systems, all of which are essential for building safety. Our systems encompass smoke detectors, fire alarms, and sprinkler systems that are specifically designed to detect and respond to fire incidents. The installation process adheres to safety regulations, while ongoing maintenance ensures these systems operate effectively over time.

C-TEC's super-enhanced CFP 2-8 zone fire alarm panel is the best-selling conventional fire panel. Certified to EN54-2/4 by the LPCB and supplied in an attractive flush or surface mountable plastic enclosure, it includes four conventional sounder circuits, a fire relay, a fault relay, 'class change' and alert inputs and two open collector outputs (remote and reset). Designed with the installer in mind, it has a wide range of engineering functions including zone test, coincidence, zone delay and non-latching zones. Standard and non-expandable Economy versions are available.

# ICT Network Infrastructure

RF-ROVOTICs provides Data Centre Deployment and office relocation services for existing and new business requirements. Moreover, RF-ROVOTICs will set up the IT system for your new office and data center space through rigorous and skilled planning, deployment, and migration. In addition, we provide Data Centre Hosting, Data Centre Relocation, and Data Centre Colocation. Therefore, at RF-ROVOTICs, our data center experts will perform a survey and carry out all necessary research to ensure optimal Data Centre Deployment. Above all, we provide a complete package of services for your data center requirements, ensuring safety and meeting your company's needs.

## **Data & Network Cabling Stack and Rack Routers and Switches Configuration**

Whether you need a new network setup, network upgrade, or network troubleshooting, RF-element. ROVOTICs can help you with your network support needs.

- ◆ Wireless Access Point Setup (seamless wireless roaming)
- ◆ Infrastructure Design and Installation
- ◆ Network Cabling (Kroner & Molex Certified)
- ◆ LAN/WAN Implementation, Troubleshooting and Maintenance
- ◆ Virtual Private Networks (VPN)
- ◆ Network Analysis & Troubleshooting Router, Hub, Switch Configuration
- ◆ Internet Connectivity & Functionality
- ◆ Firewall Security Configuration

We strive to be business providers for the best software solutions in the Area, in all IT fields our service not limited to us but beyond imagination, to day Appian and more company make the software transformation easiest, when you are thinking

# Mobile Communication

Now day's explosion of broadband traffic driven by people's need for instant access to information, Information technology and Communications (ICT) service providers across the globe are continuing their rapid migration to next-generation networks that can deliver reliable broadband services over any device anytime, anywhere communications service providers are rethinking their network infrastructure to support new technologies and applications.

Always-on connectivity and bandwidth-intensive business, lifestyle, and entertainment services are challenging traditional networks and driving profound changes in enterprises and broadband networks. With its industry-leading portfolio of network infrastructure solutions and services, RF-element.

ROVOTICs plays a crucial role in enabling its customers to deliver dynamic video, voice, data, and wireless services that are increasingly essential to businesses and on-the-go consumers. RF-element. ROVOTICs' high-performance data network, Fiber connectivity, wireless coverage, and general ICT combined knowledge and experience support a broad range of applications.

Our team of experienced professionals is proudly dedicated to delivering the highest quality standards to our clients. We enjoy the process of assisting our clients to provide new and improved services to meet their own customers' unrelenting demands for a better faster and more efficient ICT experience. The increasing global demand for bandwidth offers unique growth opportunities for

# Mobile Communication

## Mobile communication via satellite

Our mobile communication solutions allow companies the flexibility to access data services on the move, globally and stay seamlessly connected. Find out how you can optimize your company's communication with our mobile solutions.

## Wireless Networking Solutions

As a reseller of wireless networking solutions, we tackle interference issues in wireless networks through our proprietary technology. This includes noise-rejecting antennas, virtually lossless connectors, and scalable systems. Our goal is to deliver technology that enables fast and sustainable wireless connectivity.

## Drive Testing and Simulation Software.

Utilize advanced software for drive testing to assess coverage, capacity, and quality, enabling targeted enhancements. Streamlining billing and revenue management in the telecom sector is essential for improving operational efficiency and increasing customer satisfaction.

Here are some of our key strategies and solutions:

### ◆ Advanced Billing Systems

◆ **Integrated Billing Platforms:** Implement comprehensive billing systems that consolidate diverse services (voice, data, SMS) into a single platform, simplifying management and reporting.

◆ **Automated Billing Processes:** Employ automation to minimize manual intervention in billing workflows, reducing errors, and speeding up billing cycles.

# Telecom System Infrastructure

We solve the issue of interference in wireless networks by our proprietary technology based on noise rejecting antennas, virtually lossless connector and systems scalability. We deliver technology for fast, sustainable wireless. Ltd is a national services provider, ISP (Internet Service Provider), and a full ICT Service. RF-element. ROVOTICs supports businesses with diverse communications services that offer business productivity and continuity.

## ◆ Telecom Commissioning and De-Commissioning

## ◆ Fiber Optics cable installation and testing

We provide reliable internet services to all domestic and foreign companies and aim to provide the latest technologies in the fields of Internet, Communications, Telecommunication, WiMAX, and Optical solutions; this also includes End to End connectivity with last-mile patching through direct Fiber wireless and Microwave links connectivity.

Additionally, RF-element. ROVOTICs supports related services of Preventive and corrective maintenance services for the telecom towers and cabins. RF-element. ROVOTICs continues to expand its vision and business operations by constantly adding new services to its extensive portfolio of solutions.

### **Microwave Systems:**

Skilled in configuring and installing microwave link systems, including 2G Huawei Microwave Links. Completed training in tower climbing safety, firefighting programs, risk assessment safety programs, and microwave link system configuration, including RTN910 for 2G, 3G, 4G, and 5G technologies. (BMS), including risk analysis of existing infrastructure.

We strongly believe that any companies should invest wisely in technology and, as a rule, increase their operational maturity much faster than their competitors. With a stable ICT platform, Companies can innovate and develop unique and efficient business processes. The outcome is an organization with a powerful brand, inspiring culture, and increased revenue performance.

# VSAT Communication

## VSAT communication services

we provide public authorities and companies with access to fast, broadband data services in remote areas. Find out how our VSAT solutions can improve your organization's connectivity. Explore our VSAT services and get reliable broadband connectivity anywhere.

We offer reliable broadband connectivity anywhere. Explore our VSAT services and get reliable broadband connectivity. Satellite constellations in medium (MEO, e.g. mPower) and low (LEO, e.g. OneWeb) orbit expand the range of available services. Low latency, high data rates, small compact terminals, 'on the move' (OTM) and 'on the pause' (OTP).

The flexibility and agility of satellite communication is merged with the throughput and efficiency of terrestrial networks to create a new class of services.

# Business Application & Development

## **Application & App Development**

We specialize in creating custom applications and mobile apps tailored to meet your specific needs, ensuring functionality and user engagement.

## **CRM and ERP**

We implement Customer Relationship Management (CRM) and Enterprise Resource Planning (ERP) systems to optimize your business operations and enhance customer interactions.

## **Software Integration Solutions**

Our integration services ensure seamless connectivity between various software systems, enabling smooth data flow and improved operational efficiency.

### ◆ **ERP and Integration**

Proficient in ERP systems and advanced integration solutions, holding certifications from Appian Community Academy as an Appian Developer. Knowledge of cloud services, specifically AWS and Microsoft Azure.

### ◆ **Project Management**

Successfully implemented fire alarm systems to enhance safety and ensure compliance with regulations. Managed projects in Management Information Systems, ERP, SAS, OSS, and Warehouse Automation.

### ◆ **CRM Development**

Experienced in integrating and developing CRM systems.

E-commerce Solutions: Developed an e-commerce platform integrated with SAP Business One, AWS Cloud, and Azure.

# Business Application & Development

## Software Programming

Our team provides comprehensive software programming services, utilizing the latest technologies to deliver high-quality code and efficient solutions.

## Software Solutions

We offer a range of software solutions designed to streamline your processes, enhance productivity, and drive business growth.

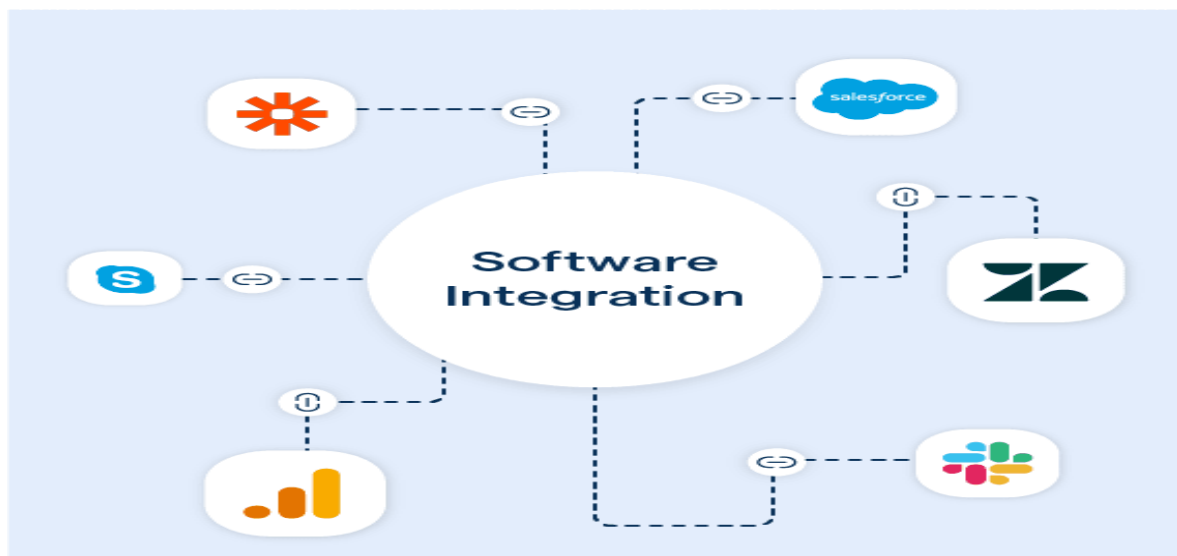

## Business Viability Study

We conduct in-depth business viability studies to assess the feasibility of your projects, helping you make informed decisions and minimize risks.

## Project Management Planning

Our project management planning services provide structured methodologies to ensure successful project execution, on time and within budget.

We are offering Data Storage with affordable Price and a good quality from European Markets
